TX-40™ Reloading Press

for 40mm Less Lethal Rounds

Designed to cost effectively reload 40mm less-lethal rounds with duty round performance, the TX-40™ is simple to operate, requires minimal training, and comes with a Lifetime Warranty!

Ten-X Tactical Propelling Charges utilize a smokeless .38 caliber blank charge which is unique to the brand of 40mm round to be reloaded. The Propelling Charges offer a clean burning powder with consistent muzzle energy and velocity. Rounds can be reloaded in seconds.

Factory new 40mm rounds can cost more than \$25 each and remanufactured training rounds cost up to \$13 each. The TX-40™ reloading system provides law enforcement the simple solution to increase 40mm training while decreasing training costs to just over **\$1 per round**.

The **TX-40™ Expander Die** saves even more money by reforming dented aluminum case mouths. 25% of cases are normally discarded because of dented case mouths. The Expander Die pays for itself after the first 60 dented casings are repaired.

The TX-40™ Expander Die can only be used to repair aluminum casings (i.e., DefTech).

Pricing:

TX-40 Reloading Press & Tools:	\$750
250 Propelling Charges:	\$300
250 Lead Free Propelling Charges:	\$325
