

TEN-X TACTICAL DIVISION FORMED AT TEN-X AMMUNITION, INC.

RANCHO CUCAMONGA, CA — September 1, 2010

Ten-X Ammunition, Inc. announces its Ten-X Tactical™ division which will focus on law enforcement, military and loading applications. “Ten-X Tactical™ will initially concentrate on: Steel Safe™ Frangible Ammo, the TX-40™ Reloading System, and the TX-50™ Reloading Press (50BMG),” said Richard Pumerantz, PhD, President of Ten-X Ammunition, Inc..

Steel Safe™ .223/5.56 rounds quickly became recognized as the only frangible ammo that eliminates nearly all damage to steel targets and reliably cycles through full auto weapons. It is the preferred round for use in live fire houses. New products include a .308 sniper training round and a door-breaching training round.

The TX-40™ Reloading System has revolutionized 40mm Less Lethal Impact Training. Departments can now safely and easily reload their own 40mm casings and increase training by reducing the cost per round to \$1. Recently released is the TX-40™ Expanding Die which allows even dented 40mm aluminum casings to be effectively reused.
